

CME/COMEX Uranium Futures (UX) Contract

CME/NYMEX Partners with UxC to Offer Uranium Futures Contracts

On April 16, 2007, UxC and CME/NYMEX issued a joint press release announcing the introduction of on and off-exchange traded uranium futures products on the CME Globex® and CME ClearPort® electronic platforms on May 6 for the May 7, 2007 trade date. The initial product was the NYMEX UxC Uranium U₃O₈ Futures Contract (UX).

CME Group announced **June 10, 2020** that several Metals products will be transferring from the NYMEX Designated Contract Market (DCM) to the COMEX DCM. As part of this move, effective Sunday, July 12, 2020 (trade date Monday, July 13), the UxC Uranium U₃O₈ futures (tag 6937-Asset=UX) will be transferred from the NYMEX DCM to the COMEX DCM. The contract will continue to clear at CME Clearing and the commodity codes will remain unchanged. To effect this change, the contract will be removed from NYMEX and added to COMEX. The formal announcement can be found at:

CME Group announced **November 13, 2018**, that NYMEX will increase the spot month position limits for the UxC Uranium U₃O₈ Futures contract going forward. Currently, the UX contract is capped at a monthly position limit of 1,000 contracts (250,000 pounds U₃O₈). However, beginning on December 3, 2018, the market will increase the position limit cap to 2,000 contracts (500,000 pounds U₃O₈) to provide market participants with the ability to take larger monthly positions in the future. The formal announcement can be found at: <https://www.cmegroup.com/content/dam/cmegroup/notices/market-regulation/2018/11/MSN11-13-18.pdf>

Uranium Contract (UX) Overview

The New York Mercantile Exchange has partnered with UxC, LLC (UxC) to provide financially settled on- and off-exchange traded uranium futures contracts. The two organizations are working together to serve the needs of utilities, consumers, uranium mining and other nuclear fuel companies, governments, banking, and financial institutions by creating a pricing benchmark for the rapidly expanding nuclear fuel industry.

The NYMEX uranium futures contract will provide the industry with a transparent pricing mechanism. The contract's final settlement price is based on the UxC index, which for the past 20 years, has provided U₃O₈, or "yellowcake" pricing. This term came from early production methods of the compound that yielded a bright yellow product resembling cake batter. U₃O₈ is the most actively traded uranium-related commodity, and the UxC pricing index has been utilized by all major nuclear fuel market participants as well as the United States government and private business organizations.

Recent events affecting supply development and the need for additional clean energy sources, such as nuclear power, have created the desire for a more transparent forward price curve as well as increased risk management tools in a volatile uranium marketplace.

The uranium futures contract is available for trading on CME Globex® and clearing on CME ClearPort®. The size of each contract is 250 lbs. and prices are quoted in U.S. dollars and cents. The final settlement price is the spot-month end price published by UxC.

Uranium Contract (UX) Specifications

Trading Unit

250 pounds of U₃O₈

Price Quotation

U.S. dollars and cents per pound

Minimum Price Fluctuation

\$0.05
