

The Nuclear Fuel Policy Source

International Nuclear Fuel Policy Briefings

From the early days of the nuclear fuel industry to today, government policy decisions have shaped the way we do business. The events at Fukushima Daiichi marked a turning point in the nuclear industry throughout the world, leading to a range of political responses by governments around the globe. In the wake of the Fukushima accidents, the role of governmental and public policy role has become even more important in all components of the nuclear fuel market and the wider nuclear industry.

UxC's *Policy Watch* has been instrumental in tracking global political reaction to the reactor accidents in Japan. *Policy Watch* tracks decisions in such key areas as regulatory policy, economic and trade policy, nonproliferation, and national security, recognizing that decisions made today will shape

the market for decades to come.

UxC's *Policy Watch* serves as a detailed, accurate, and timely source of information on key policy issues that affect the global nuclear fuel market. This online information source puts detailed information and analysis into a consulting package that is right at your fingertips.

Detailed Coverage, Easily Accessible

UxC's *Policy Watch* includes on-line access to background information and updates related to key policy issues that affect the nuclear fuel industry. As issues evolve, subscribers will receive timely and accurate updates that report and analyze the latest developments. These updates delivered electronically will also be retained in our on-line service for future reference. Recent UxC *Policy Watch* updates have included:

- Global Political Reaction to the Reactor Accidents in Japan
- China's Nuclear Energy Program After Fukushima
- Germany's Nuclear Phase-Out
- DOE Uranium Inventory Updates
- Namibia's Uranium Mining Policy
- American Assured Fuel Supply
- Yucca Mountain Termination

Additional Services

UxC's *Policy Watch* also includes:

- A "table of contents" style listing for one-click access to email updates.
- Access to a comprehensive list of key documents (including some that are not available on the Web) as well as hyperlinks for each topic. Key document links are added on a regular basis.

Issues Include: (but not limited to)

- **Post-Fukushima Impacts - NEW**
- General Energy Policy, including energy legislation
- International and Nonproliferation Policy
- Government Stockpiles
- U.S.-Russian Nuclear Trade
- Multilateral Fuel Supply Assurances
- Peaceful Nuclear Cooperation
- Spent Fuel Management

Policy Watch also includes access to all of UxC's policy experts who can provide additional consultations on various policy issues. This contact can provide an excellent opportunity to discuss key policy issues and their implications in-depth. Customer-specific projects can also be arranged under mutually-agreed upon terms.

Meeting Summaries

As a service for our clients, UxC provides summaries of important nuclear industry conferences and meetings, which are sent to subscribers through our web-based system. The Meeting Summaries service covers a variety of policy-related meetings and hearings from around the globe that complement the analysis of the *Policy Watch* service. UxC offers discounts for a package of the two services.
