

# The Leading Source for Timely Market Information

## Keeping Track of the Nuclear Fuel Market

The Ux Consulting Company, LLC (UxC) publishes one of the nuclear fuel market's best known newsletters, the *Ux Weekly*®. This widely read newsletter is issued every Monday and has been published for over 25 years. The *Ux Weekly* is the primary publication where the weekly Ux U<sub>3</sub>O<sub>8</sub> Price along with month-end Long-term U<sub>3</sub>O<sub>8</sub>, SWU, North American Conversion, and European Conversion prices and UF<sub>6</sub> Values are published. It contains thought-provoking commentary, analyses of market developments and a summary of current news events. The *Ux Weekly* is available by e-mail, on-line, and/or mail.

## UxC's Subscriber Services

As a subscriber to the *Ux Weekly*, you will receive more than just the nuclear fuel market industry's leading newsletter. Your company will gain access to a host of services including the UxC

Daily News Headlines and UxC Subscriber Services website, which, when combined with our public website, can be used as your Internet portal to the nuclear fuel industry.

UxC's public website, [www.uxc.com](http://www.uxc.com), debuted in late 1995, offering industry insiders and the general public one of the first comprehensive sites related to the nuclear fuel market. This was the first website to publish spot prices for uranium, conversion and enrichment, and still remains the leading public website with extensive price information.

The Subscriber Services site, accessible only to UxC clients, initially went live in mid-1998. A number of major site redesigns have been completed over the past couple of years along with extensive content additions as a service to our customers. Services include spreadsheets containing updated price information, online access to nuclear fuel market headlines, and the ability to perform key word searches of all issues of the *Ux Weekly* since 1996. Today the site is a growing resource for the latest information on the nuclear fuel market.

## Daily News Headlines & Prices

Prior to a site redesign, UxC launched its Daily News Headlines e-mail service in January 2002. Trying to keep up with all of today's information sources – especially since the advent and expansion of the Internet – is a time consuming and sometimes frustrating task. UxC's News Headlines service reduces some of the headaches by filtering a

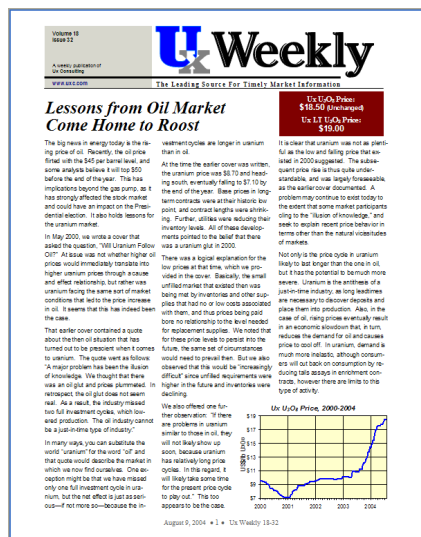

number of news sources, giving you a quick review of the each day's fuel-related issues. As pictured above, news headlines from around the world are delivered directly to your email box daily. In September 2009, the UxC Broker Average Price (BAP) was introduced to the industry. This daily pricing service keeps industry participants up-to-date with the latest pricing provided by the participating nuclear fuel brokers (Evolution Markets and MF Global).

**The *Ux Weekly* is more than a simple newsletter, it is an information service provided by the nuclear fuel market's leading consulting company.**

Additional information about this newsletter and the associated services that accompany a subscription can be found online at our public website at: [www.uxc.com/products/uxw\\_overview.aspx](http://www.uxc.com/products/uxw_overview.aspx)
