Nuclear Fuel Training Seminar

Mastering Market Principles & Developing Effective Strategies

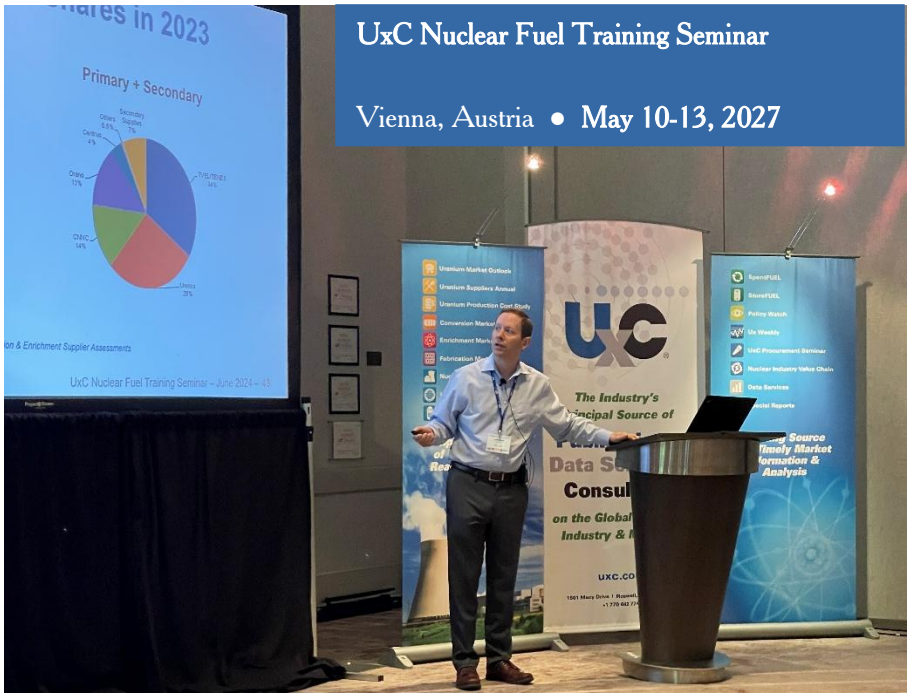
Advanced Fuel Market Training

People from all over the world have been raving about UxC's Nuclear Fuel Training Seminar, which has become a premier event for all nuclear industry professionals and others interested in learning more about the nuclear markets. UxC is pleased to announce that its next Nuclear Fuel Training Seminar will be held in Vienna, Austria, in May 2027.

For the past 20+ years, global market participants have joined UxC's Nuclear Fuel Training Seminars. As the nuclear fuel markets continue to experience many changes, all market participants require up-to-date knowledge and unbiased insights to formulate effective strategies for procurement, sales, investment, or other nuclear fuel-related objectives. UxC's Seminar provides an advanced understanding of the factors affecting nuclear fuel demand, market price formation, supply source availability, supplier motivations, utility contracting practices, as well as policy and financial issues affecting the markets.

Seminar Overview

The first day of the Seminar is devoted to examining current market and industry trends for the uranium, conversion, enrichment, and fabrication sectors, as well as presenting supply and demand outlooks, price forecasts, inventory holdings, and other key factors and trends affecting each market segment. Forecasts are presented and discussed for each of the four front-end markets and historical perspectives are incorporated to provide attendees with UxC's distinctive views of the nuclear fuel markets.



The second day provides an in-depth discussion of critical market issues, such as price reporting and the latest practices in buying and selling, as well as key policy issues affecting the markets. UxC experts will be on hand to provide their perspective and experience on important topics affecting the nuclear fuel cycle.

On the third day, the seminar shifts to group discussions and role-playing exercises to allow participants to put their newly gained knowledge into practice. Part of day three is split into two separate tracks: one for utility buyers focused on the best strategies for fuel procurement, and another track for non-utility attendees centered on sales and marketing strategies.

The primary aim of UxC's Nuclear Fuel Training Seminar is to provide a comprehensive understanding of all aspects of the nuclear fuel market. Ample time for questions is included to ensure attendees obtain maximum benefit from their time with UxC experts plus interactions with fellow participants.

Seminar Materials

UxC provides all presentation slides and additional information electronically for each participant to follow the lectures throughout the seminar. Since all presentation materials are provided electronically, UxC highly recommends that each participant bring a laptop or tablet computer to the seminar.

Target Audience

UxC's Nuclear Fuel Training Seminar is open to all participants, including utility fuel managers, supplier marketing specialists, traders, investors, and government staff, among others. Anyone exposed to the nuclear fuel markets will gain a new, enhanced perspective from this comprehensive three-day event.

For more information, please contact Eric Webb (eric.webb@uxc.com).

Nuclear Fuel Training Seminar

Seminar Venue

The next UxC Nuclear Fuel Training Seminar is scheduled for May 11-13, 2027, with a welcome reception to be held on the evening of Monday, May 10th before the 3-day seminar at the Hilton Vienna Plaza Hotel in central Vienna, Austria (about 25 minutes from the Vienna airport). The seminar is scheduled to end at 3:00 pm on Thursday, May 13th. A dedicated hotel reservation link will be made available.

Hotel information:

Hilton Vienna Plaza Hotel
Schottenring 11, A-1010
Vienna, Austria
TEL: +43-1-313-900

Seminar Cost

The cost of the seminar is US$3,800 per attendee. An early-bird rate of US$3,200 will be available for registration by February 28, 2027. The seminar fee covers all course materials, as well as the reception, breakfast and lunch each day, plus special group dinners on May 11 and 12. Snacks and refreshments are also provided. Basically all meals are included throughout the seminar!

Note that UxC limits registration to a maximum of 5 participants from any individual company/organization to ensure a diverse level of participation

UxC Nuclear Fuel Training Seminar Schedule

Day 0 (May 10): Welcome Reception (in the evening)

Day 1 (May 11): Nuclear Fuel Cycle Fundamentals

Reactor Markets and Demand Analysis

Key questions covered: What is the global outlook for nuclear power and how will regional differences evolve over the coming decades? How do these forecasts translate into nuclear fuel demand now and in the future? What reactor technologies and market factors will drive future fuel cycle decisions?

Fuel Markets 101

Key questions addressed include: How do the markets currently function? What factors are shaping the markets today (e.g., emergence of the mid-term market)? Why do different market players act the way they do?

Supply Component Analyses

Uranium – Supply and demand fundamentals, mining methods and production costs, historical contracting trends, current and future prices, issues affecting future market trends, among others.

Conversion – Supply and demand fundamentals, production costs and possible new plants, historical contracting trends, current and future prices, issues affecting future supply, among others.

Enrichment – Supply and demand fundamentals, current and future technologies, historical contracting trends, current and future prices, issues affecting SWU trade, inter-relationship of enrichment and uranium, among others.

Fabrication – Supply and demand fundamentals, market shares and contracting trends, new fuel designs, current and future prices, and issues affecting markets.

Secondary Supplies – The role of government and commercial inventories, supply/demand imbalances, inventory disposition and expansion strategies, etc.

Day 2 (May 12): Nuclear Fuel Markets In Practice

Market Issues

A broad range of discussions, including: basics of buying & selling nuclear fuel, roles and behaviors of various fuel market participants, the role of financials in the uranium market, optimization of nuclear utility fuel costs, and modeling & price forecasting.

Expert Presentations

UxC experts will also present their views on such important market issues as nuclear fuel brokerage and advanced contracting approaches, international policy issues affecting the nuclear fuel markets, among other important topics.

Nuclear Fuel Price Reporting

UxC will provide in-depth explanations of how it approaches and handles nuclear fuel price reporting, including examples from real world experiences.

Day 3 (May 13): Group Discussions & Role Playing in Separate Tracks

UxC continually surveys active market participants with a special emphasis on utility fuel procurement management practices as well as supplier marketing and contracting trends. We provide a summary of our research, highlighting how trends have evolved to respond to the ever-changing markets.

Track 1: Utility Fuel Procurement Strategies (for utility participants only)

To build a successful procurement strategy, we evaluate ways to reduce fuel costs such as optimal tails and contract flexibilities. We also have detailed discussions on contracting mechanisms, the contracting process, and renegotiations, ending with aspects of implementing a procurement strategy. A role-playing exercise focused on utility nuclear fuel procurement will also be conducted.

Track 2: Sales and Marketing Strategies (for all other participants)

Discussions will be held on important factors affecting suppliers and others active in the nuclear fuel markets, including: understanding utility contracting preferences, changes in nuclear fuel pricing, sales strategies, among others. A role-playing exercise focused on sales and marketing will also be conducted.

Day 3 target end time is 3:00 pm
