

## UxC: Data Services

UxC is probably best known for its price reporting services, including the weekly reporting of the [Ux U<sub>3</sub>O<sub>8</sub> Price](#). Dating back over two decades, the Ux U<sub>3</sub>O<sub>8</sub> Price indicator is the longest-running weekly uranium price series. In addition to being used by the industry in sales contracts, Ux Price indicators have been referenced by the U.S. Government in the determination of price-tied quotas and for determination of prices in the highly enriched uranium (HEU) deal between the U.S. and Russian Governments. The Ux U<sub>3</sub>O<sub>8</sub> Price is also used as the official settlement price for the [CME/NYMEX UxC Uranium Futures Contract \(UX\)](#). Ux Price indicators are also referenced in The Wall Street Journal and other major media publications when they discuss uranium price developments.

UxC is also known for its data collection with respect to supply and demand, and market transactions for [uranium](#), [conversion](#), and [enrichment](#). As part of its price reporting and consulting services, UxC has developed an extensive database of transactions. While detailed information in this database remains confidential, UxC provides trending analysis as part of its market research services. UxC also provides detailed forecasts based on various methodologies and forecasting models, including reactor requirements forecasts and uranium production cost curves. Related to its Data Services category, UxC manages and assists in the development of web pages, computer databases, and other information services to support a client's needs.
