Date Meeting/Event

Jan 14-15, 2020 **Applications for SMRs and Advanced Reactors to promote clean growth**

Location Abu Dhabi

Sponsor Strategic Communications

Contact Christina Logan

Description As the world's population grows, coupled with the inextricable link between electrification and quality of life, electricity is needed globally, to support existing and future needs. If the nations of the world are to meet their climate change commitments, the provision of electricity must be done in a manner that supports a 'clean growth' agenda, as the world becomes more dependent on stable electricity. Small Modular Reactors (SMRs) and Advanced Reactors (ARs) are uniquely positioned to meet current and future needs of advanced society.
