

Nuclear Fuel Market Review

In March 2015, UxC published the third annual edition of our special report entitled *2014 Nuclear Fuel Market Review* (NFMR). The primary purpose of this report is to provide a concise review of the major developments in each of the four nuclear fuel markets over the past year. This report emanates from a special client project that we started in 2013. The client was so pleased with this report that they requested UxC to publish the same report again three years in a row.

The NFMR report covers the following basic format:

1. Annual Market Overview
 - Top stories of 2014
 - Nuclear fuel market commentary
 - Nuclear power developments
 - Looking forward to 2015
 - Trade and policy issues
2. Uranium Market
 - Market overview
 - Prices and transactions
 - Supply summary and market shares
 - Production news
 - Secondary supplies
3. Conversion Market
 - Market overview
 - Prices and transactions
 - Supply summary and market shares
 - Production news
 - Secondary supplies
4. Enrichment Market
 - Market overview
 - Prices and transactions
 - Supply summary and market shares
 - Production news
 - Secondary supplies
5. Fabrication Market
 - Market overview
 - Prices
 - Supply summary and U.S. market shares
 - Production news

This report provides a concise synopsis of all the important market developments in each of the nuclear fuel sectors that occurred in the past year. It is an extremely useful tool to prepare for strategic planning for the coming year and as a reference tool when discussing the recent fuel market situation in such forums as board meetings, client meetings, or Public Utility Commission hearings.
