

Nuclear Power Outlook & UxC Requirements Model (URM)

Tracking Reactor Developments

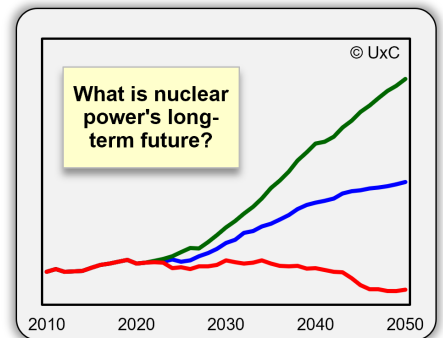

Keeping abreast of the global nuclear power industry can seem quite difficult, especially given the impacts of climate change policies, shifting prices for fossil fuels, rapid increases in renewables, as well as rising energy security concerns. UxC continuously tracks nuclear power developments all over the world via its *Nuclear Power Outlook* (NPO) reporting service, which provides in-depth access to the nuclear power industry's most pertinent information. This multifaceted, up-to-date, and analytical product condenses the entire nuclear power industry into one manageable information and forecasting package. The other unique feature to the NPO is the continuity with which the information will be provided to you: daily *UxC Headline News* and complete and concise quarterly reports with updated quarterly reactor forecasts that extend through 2050. Finally, UxC's team of nuclear power market experts stand ready to support our subscribers with special requests.

UxC is an established leading source of consulting and information services in the global nuclear markets. Since 2007, the NPO has provided enhanced coverage of the overall nuclear power industry, with an emphasis on global reactor forecasts. The NPO provides subscribers with first-hand access to and analysis of every major development in the nuclear power industry in an easy-to-use report package.

Offering Comprehensive Coverage

NPO reports are updated and issued every quarter. Each NPO report provides three highly useful items: 1) in-depth topical analyses of major market trends; 2) a review of highlights affecting countries, utilities, and suppliers in the past quarter; 3) detailed updates of all the latest developments in nuclear power by region and country; and 4) updates to our highly versatile data tables and statistical analyses with forecasts for all nuclear reactors (current, under construction, and planned) around the world through 2050. The NPO forecasts include three reactor cases: Base, High, and Low to provide better comparisons of the potential nuclear power future.

Finally, if you do not already subscribe to our *Ux Weekly* newsletter, the NPO package also gives you access to our *UxC Headline News*, which deliver the day's nuclear-related news directly to your email inbox every weekday. Access to the NPO website and the full archives of past reports is also included as part of the subscription.

What's Included in the NPO?

The quarterly NPO product includes:

- Profiles on each active nuclear power country as well as analysis of the nuclear power plans in over 20 high potential newcomer countries
- Concise summaries and accurate analysis of the latest reactor developments by country and region
- Spotlight analysis sections on key nuclear market issues, such as Japan reactor restarts, SMRs, climate change policies, nuclear power economics, etc.
- In-depth analysis of our three forecast scenarios through 2050, including country-level data on current and future reactor units, installed nuclear capacity (MWe), and nuclear generation (GWhr)
- Detailed statistical review with accompanying MS Excel data spreadsheets

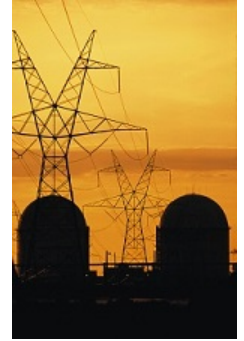

In addition to our comprehensive reports, subscribers receive UxC's Headline News service, which delivers daily summaries of key nuclear news to your email inbox. Access is also provided to the NPO subscriber website as well as support from our nuclear experts.

UxC Requirements Model (URM)

Using the NPO reactor forecasts, UxC has also developed a sophisticated global nuclear fuel cycle requirements model known as the *UxC Requirements Model (URM)* as a compendium product to track country-level uranium and other nuclear fuel requirements through 2050. The URM Report and spreadsheets are also published every quarter. A URM subscription is available only as an add-on to the NPO, since it is based on the main reactor forecast assumptions.

Purchasing Information

There are multiple purchasing options for these high-value NPO products:

- NPO Annual Subscription: **US\$5,000.00**
- NPO Single Edition: **US\$3,000.00**
- NPO + URM Annual Package: **US\$6,500.00**
- NPO + URM Single Edition: **US\$3,750.00**

A convenient online order form is available. Note that existing Market Outlook (UMO/CMO/EMO/FMO) subscribers may be eligible for a discount.

Please see our product flier and table of contents from the NPO Overview and Quarterly Report in Adobe Acrobat PDF  format.
