

# SpentFUEL & StoreFUEL

## UxC Backend Coverage

Since 2007, UxC, LLC (UxC) has published the SpentFUEL industry newsletter and the StoreFUEL monthly report, and therefore, brings its unique approach in the front-end market to the back-end. Both publications cover major fuel cycle and backend-related conferences in detail. In addition, UxC can advise clients in issues related to the back end of the fuel cycle, including profiles of utility spent fuel storage facilities and plans, country profiles, vendor profiles, etc.

## The Latest Developments in Spent Fuel Management and Transportation

**SpentFUEL** is the only industry newsletter devoted solely to spent fuel storage and transportation issues. Published every Friday, 50 times a year, *SpentFUEL* covers new market and political developments to bring the reader up-to-date on the numerous activities and issues facing utilities and back-end suppliers today. Issues include the U.S. geologic disposal program, at-reactor dry cask storage plans and licensing activities, contract awards, interim storage proposals, legislation and budget issues affecting the backend, utility spent fuel pool information, surplus plutonium disposition, and transportation. The publication also covers developments in the waste management policies and programs in other parts of the world, including both short- and long-term storage plans, developments related to national or regional permanent disposal facilities, reprocessing, mixed-oxide fuel use. *SpentFUEL* is published every Friday, 50 times a year, by UxC, LLC (UxC). The cost of a one year subscription starts at **US\$2,500.00**. *SpentFUEL* presents information gathered through the activities of the publisher. Although great effort is dedicated to show accuracy, data are sometimes obtained from sources believed by UxC to be reasonably accurate; therefore, no warranties, express or implied are made, nor any liabilities assumed by UxC for the accuracy, effect or usefulness of any data contained in *SpentFUEL*.

## Special Introductory Offer

The standard individual subscription to the *SpentFUEL* covers 52 weeks. This special offer, available only to new subscribers, is for a **full-year subscription** (50 weeks) with a **15% discount**. Therefore the introductory rate would be **US\$2,100.00**. Renewals after this trial period will be at the standard rate for a 52-week period.

To receive this new subscriber rate, simply mention the special introductory offer when you place your order over the phone, or indicate the Special Trial Offer on the [on-line order form](#).

## Dry Storage in the U.S.

**StoreFUEL** was created to assist utility fuel managers, cask designers, fabricators, and other related companies in staying current on the U.S. Nuclear Regulatory Commission's (NRC) certification process for spent fuel cask technology. *StoreFUEL*, published on the first week of every month, details recent cask vendor licensing milestones, updates on licensing activities for each vendor, a brief summary of all active U.S. dry storage programs, upcoming licensing milestones and a recently enhanced section on decommissioning of nuclear power plants. Each edition includes a number of useful reference tables such as casks loaded in the U.S., reactor license expiration dates, plans for future ISFSIs, and more. [Click here to view a flier.](#)

*StoreFUEL and Decommissioning Report* is published the first week of every month, 12 times a year, by UxC, LLC (UxC). The cost of a one year subscription starts at **US\$2,000.00**. *StoreFUEL and Decommissioning Report* presents information gathered through the activities of the publisher. Although great effort is dedicated to show accuracy, data are sometimes obtained from sources believed by UxC to be reasonably accurate; therefore, no warranties, express or implied are made, nor any liabilities assumed by UxC for the accuracy, effect or usefulness of any data contained in *StoreFUEL and Decommissioning Report*.
